**YANG iT** Technology GmBH

**YEONG YANG**

Hamburg, 2008.10.01

"...**T**he new Intel Desktop Board G945GCLF was designed to support basic computing, delivering incredible capabilities for the new flexible Mini ITX form factor. Featuring the integrated 45nm Intel Atom processor and the Intel 945GC Express Chipset, this board delivers an energy-efficient nettop solution for home users as well as for unique vertical market needs..."

**W**e are pleased to present several Mini ITX chassis which could match the new board.
Due to the low wattage of the Atom CPU, customers who prefer the Serener chassis can choose between a heatpipe and non heatpipe solution. As for heatpipes we do offer HP61 for **GA-L01, GD-L01, GS-L01** and **GS-L02**, HP62 for **GS-L05** and HP63 for **GS-L06**.
**T**he new Yeong Yang **YY-C620** which features an aluminium front, two built-in 5cm fan and a PCI riser card, provides an optimal solution for the Intel Desktop Board.
